HEATFLO KIT

Protect heat sensitive televisions, artwork and other decorative wall materials. No blower required, the HeatFlo kit works through natural convection to redirect heat from the fireplace upward through hidden ductwork and out through a sleek horizontal vent. Walls stay cooler and heat flows more evenly through the room for a comfortable fireplace experience.

- TV & Artwork can be placed above the fireplace
- Helps protect heat sensitive wall facing materials
- Improves convective heat circulation in the room
- No electricity or blower required for operation

IMPORTANT NOTES:

As with any fireplace, this appliance is extremely hot during operation. Read and understand all operating instructions before using this appliance. For further information, consult your dealer. Local conditions, such as elevation and choice of fuel will affect overall appearance of the fire and heating performance. Performance can also vary with home design and insulation, ceiling height, accessories chosen and appliance location. Diagrams, illustrations and photographs are not to scale — consult installation instructions. Product designs, materials, dimensions, specifications, colors and prices are subject to change or discontinuance without notice.
