PRESS RELEASE

Seal Shield Introduces World's First Waterproof, Wireless Mouse That Is Rechargeable, With No Batteries To Change Ever.

Healthcare company demonstrates new, washable mouse at the APIC infection control conference. (Booth 1150).

Baltimore, MD (June 27, 2011) – Seal Shield LLC today announced the new SILVER STORM™ waterproof, wireless mouse. The company demonstrated the new mouse, along with other infection prevention products, at the APIC infection control conference in Baltimore, MD. The new mouse has been designed to help prevent cross contamination infections which are spread from shared computer input devices.

According to a bacteria study of common touch items, performed by the Korean Consumer Protection Board, "Computer mice have more than twice the concentration of germs as was found on doorknobs and handles in public restrooms." Overall, computer mice ranked as the second most bacteria-infested item in the study.

The SILVER STORM™ mouse is a wireless scroll wheel mouse that is 100% waterproof, washable and even dishwasher safe. The mouse is environmentally friendly, with antimicrobial product protection, and a rechargeable lithium battery so there are no batteries to buy or change ever. The SILVER STORM™ waterproof, wireless mouse can hold a charge for up to a week, and is easily recharged by the included USB quick-charge station with integrated 3 port USB hub and RF Nano receiver. The waterproof, wireless mouse is available in black or white and is priced at \$69.99 MSRP. The product is scheduled to start shipping early Fall, 2011.

Seal Shield™ designs, develops and manufactures medical grade, infection prevention technology for hospitals and the home. Seal Shield is a world leader in infection control products including patent pending washable keyboards, mice and TV remote controls. For more information please visit <http://www.SealShield.com/>
