Seal Shield launches World's First Dishwasher Safe, Wireless Keyboards and Mice

Healthcare company to introduce New Waterproof Keyboards and Mice at the CES Consumer Electronics Show in Las Vegas (Sands booth#74021).

Jacksonville, FL January 7, 2009 – Seal Shield LLC today announced the new SILVER SURF™ family of waterproof, wireless keyboards and mice. The products are the world's first wireless keyboards and mice that are **fully submersible, dishwasher safe and antimicrobial product protection**. Recent studies have shown computer keyboards to be among the dirtiest surfaces in the home and office. According to Dr. Charles Gerba, University of Arizona, "the average keyboard harbors 400 times more bacteria than the average toilet seat."

SILVER SURF™ Wireless Keyboards and Mice are easy to clean. They go straight from the desktop to the dishwasher and back again. There are no wires to disconnect, and no need to remove batteries for cleaning. SILVER SURF™ Keyboards and Mice are safe for the entire family including children and pets. Regular cleaning in the sink or dishwasher can even help prevent the spread of germs, viruses and bacteria, which are known to harbor on frequently touched surfaces.

The SILVER SURF™ Keyboard is a full function multimedia keyboard with integrated ergonomic wrist rest. It is available in 2.4GHz wireless and corded versions. The keyboard is also offered with an optional, integrated SEAL PAD™ touchpad pointing device for an all-in-one waterproof solution. It even works under water!

The SILVER SURF™ Mouse is a fully submersible, washable laser mouse with a unique SEAL GLIDE™ scroll feature. The SEAL GLIDE™ uses touchpad technology and provides a natural and intuitive scroll solution for easy web site navigation. The high grade laser insures accurate tracking on any surface, even for medical and gaming applications. The SILVER SURF™ Mouse is offered in 2.4 GHz wireless and corded versions.

In addition to being washable, the SILVER SURF™ keyboards and mice feature SILVER SEAL™ antimicrobial protection. Unlike many antibacterial products, SILVER SEAL™ utilizes natural, pure silver ions which are embedded in high grade plastic to create a safe, effective, inorganic, antimicrobial product protection solution. SILVER SEAL™ protection has been shown to safely inhibit microbial growth and reduce the spread of odor causing bacteria.

“The new SILVER SURF™ family of consumer products is manufactured with the same medical grade, infection control technologies used in hospitals worldwide,” states Seal Shield CEO, Brad Whitchurch. “The wireless design is ideal for the home or office, but the unique waterproof capabilities make the SILVER SURF™ Keyboards and Mice the only choice for less traditional locations including the kitchen, bath, pool or spa.”
