### **New Infection Control Web Site Combats Hospital Acquired Infections**

*Healthcare technology company, Seal Shield LLC, launches new web site dedicated to infection prevention.*

**Jacksonville, FL (February 29, 2016)** – Seal Shield LLC, today announced the launch of their new infection control website. The web site, [www.SealShield.com](http://www.SealShield.com) will be devoted to new and existing technology solutions developed to reduce the spread of deadly hospital acquired infections such as MRSA, VRE, Norovirus and Cdiff.

Approximately two million Americans are the victims of a hospital acquired infection each year. Of those, as many as 90,000 die annually from an infection they received in a US hospital. Seal Shield offers solutions to prevent hospital acquired infections, and with this new web site, provides a platform for the entire infection prevention community.

Seal Shield is the leading innovator in infection control solutions. Seal Shield's new web site is designed to be a resource for patients and practitioners. The new site provides information on hospital acquired infections and emerging technology solutions to combat the spread of those infections. Seal Shield's new web site is mobile friendly and fully integrated with NetSuite ERP, the leading cloud based enterprise software for business.

According to Seal Shield CEO, Bradley Whitchurch, "Our goal was to develop a site that went beyond the sale of products and services, but instead provided real informational value on emerging research, best practices and total infection control solutions. It is not a static site, and is devoted to keeping up to date on breaking news in infection prevention."

Seal Shield is a world leader in infection control technology. Seal Shield designs, develops and manufactures medical grade, infection prevention technology for hospitals and the home including UV sanitizers, air purification systems, antimicrobial product protection products, waterproof keyboards, mice and TV remote controls.
