INOX Privacy Barn Door Lock to make its KBIS debut in Orlando

Door hardware company will also unveil new custom design and finish options

ORLANDO, FL – <u>INOX</u>, creator of innovative and premium decorative hardware and door locks, will showcase its new Privacy Barn Door Lock at the <u>Kitchen & Bath Industry Show</u> (KBIS) in Orlando, Florida, from Jan. 9 to 11 in booth S5631. The patent-pending Privacy Barn Door Lock is a sophisticated yet discreet integrated locking solution for designers, architects and homeowners to secure the door for added privacy.

"We design and manufacture all of our products in house—even the inner mechanics of the locks—so we are able to engineer innovative solutions for any type of door hardware application," said Jeff Howes, President of INOX. "For instance, we invented the Privacy Barn Door Lock so that architects, designers and homeowners could finally add a lock to their barn door that guarantees both superior privacy and a beautiful design aesthetic."

The company will introduce the Privacy Barn Door Lock during the exclusive KBIS DesignBites presentation on January 10 (Bath Day) at 12:00 p.m. at the KBISNeXT™ Stage located in the south hall.

INOX will be displaying its full suite of new products, including:

- The new Art Deco Series offers a complete collection of products to transform utilitarian door locks, card readers and other hardware into custom-created, Jazz Age-style designs with a contemporary sensibility. This new series is made from heavy-duty brass and includes a commercial-grade, springassisted chassis for ease of operation and extreme durability.
- CeraMax[™] is a line of ceramic-coated door hardware for designers, architects and homeowners
 looking for a finish option that prevents deterioration due to harsh environments, including salt spray,
 oxidation, humidity and ultraviolet light. INOX is the first and only door hardware manufacturer to offer
 this finish option.
- INOX will also introduce its new <u>Universal Multipoint Series</u>, which is a trim solution designed to fit 95% of multipoint locking systems for swing doors by major door manufacturers.
