

Logos Imaging announces Gammatec NDT Supplies SOC Ltd. as a new distributor

(July 12, 2018) Loveland, CO – Logos Imaging LLC (Logos), a leading provider of X-ray solutions for industrial and security customers worldwide announced today that it has appointed Gammatec NDT Supplies SOC Ltd as its exclusive distributor for non-destructive testing (NDT) portable X-ray products in Nigeria, Saudi Arabia, United Arab Emirates, Bahrain, Kuwait, Oman, Qatar, Iraq, Yemen, Jordan and Malaysia. Under the agreement Gammatec and its partner companies, will become the primary provider of support in these regions.

“With Gammatec as our distributor, we increase our presence in the NDT radiography market in vital areas of the world” said Kfir Kirshner, NDT Sales Manager of Logos Imaging. “Our goal is to continuously improve our customers’ experience in every aspect. Expanding our network of sales and support and being in close proximity to where our customers are is a key initiative towards achieving that.”

With thousands of imaging systems installed worldwide, Logos is well established in markets requiring portable imaging solutions. Based in Loveland CO, Logos Imaging LLC currently manufactures and sells it’s popular NEOS III, ORAMA II, and MÓNOS imaging systems. Logos is committed to designing and manufacturing innovative, cost-effective digital imaging solutions for NDT applications. We produce three flat panel detector (FPD) systems for the industrial market. When paired with our proprietary Logos Imaging NDT application, the systems provide users all the tools need to see the project through to a successful completion.
