*My dog was given 6 months to live at the most
By R.B. from Toronto Ontario Canada*

Comments about Pet Wellbeing Young at Heart for Dog Heart Disease:

Young at Heart has extended my dogs life. Not only is he still alive (15 years of age, Pom, CHF and collapsing trachea) he has lived a year past the estimation my vet gave him. He has no fluid in his lungs, he breathe counts are low and he is happy, eating and playing with our younger second dog. Before YaH, my dogs heart was enlarging every time we took an Xray (every 3 months) it has now stayed the same size. In the beginning, the improvement when we started YaH on our Pom was so good the vet took our dog off of nearly all he medications. It has been almost 2 years and my dog is cheerful, full of energy and despite coughing from the trachea issues, doing very well. I highly recommend Young at Heart. There were NO side effects, I drop it on his food and he eats as happily as ever. Anything that slows or stops the use of pharmaceuticals is wonderful. I would rather not destroy my dogs liver. Thank you for this product.

*YAH awesome product
By snoozers mom from iowa*

Comments about Pet Wellbeing Young at Heart for Dog Heart Disease:

My 14 year old beagle has congestive heart failure . #4 heart murmur. I moved to another state and knew I needed a new vet and was searching online and found this site. It was a blessing to get him off of the meds the previous vet had him on. they did not help his cough. He was so restless. I felt I had nothing to lose. I started him on YAH and within 3 weeks he was less restless, less cough, and more energy. I found a very nice small town vet. She is onboard with the treatment. Now 3 months later his heart murmur is up to a 5 and cough has got worse. Keeping him on YAH and she has added Lasix to get fluid away from his heart and just want my old buddy comfortable for as long as he can be with me.

I will continue using this product
By Maggie from Colorado Springs, CO

Comments about Pet Wellbeing Young at Heart for Dog Heart Disease:

I adopted a mill dog rescue that is considered a "hospice case". He has congenital heart disease as well as other problems. When I first got him he was coughing a lot, even in times of rest. I have used Young at Heart every day since I received it, it has only been a couple of weeks but I see a difference! He only coughs when he's been out in the cold or when he drinks. He drinks excessively because of the medication he is taking to keep him from retaining fluid, and so he drinks for a long period of time and I think it just takes his breath away. But since he has been taking Young at heart, which I just conveniently put the drops on his food, I have seen a marked improvement in both the coughing and his energy level. I will continue to use this, and would recommend to anyone who's dog could benefit from it!

So happy I found YAH
By The Spark from CA

Comments about Pet Wellbeing Young at Heart for Dog Heart Disease:

My 10 year old Maltese was diagnosed with a no. 3 heart murmur 2 years ago. Vet told us that at this stage there was nothing to be done except wait until it got worse and then he could be put on medication. I was not going to wait until my little dog got worse. I found this wonderful company and discovered YAH. That was 2 years ago my Sparky could not be any better.

I highly recommend this product!

By Mya from Sarasota, FL

Comments about Pet Wellbeing Young at Heart for Dog Heart Disease:

I absolutely love this product. I was apprehensive at first but read the reviews and decided to give it a try. My female chi-poo dog is 11 and suffers from stage 3 congestive heart failure, a heart murmur, enlarged heart and a collapsing trachea. She was diagnosed over a year ago and is still going strong. She is also on enapril and lasix. I strongly believe this medicine has helped extend her quality of life and would highly recommend to everyone!

By Dee's Honest opinion

from Evans GA

Comments about Pet Wellbeing Young at Heart for Dog Heart Disease:

My 10 year old dachshund was diagnosed with a heart murmur. she also had a small stroke a few weeks back. She is on one aspirin a day. I was looking for something natural to help her with the heart murmur. I found young at heart on the internet. The reviews on this product are very positive. The price seem a little high, but after receiving it in the mail and using it, it will last at least 3 month, since I only have to give her 13 drops twice a day (I just put it on a small spoon with low fat liver sausage and she takes it without any problem). So it is worth the money and the try. First 3 weeks nothing really happen. But last week it seems like she has a little bit more energy. I do not aspect wonders in the first 2 month, and I will keep on giving it to her. I will take her for her check up end of January. I hope that her heart improved. I will see...

awesome product

By Happy Dog Owner from Reading, PA

Comments about Pet Wellbeing Young at Heart for Dog Heart Disease:

Our 10 yr old Jack Russell/Pug was diagnosed with a #3 heart murmur. The vet said this was "normal" for an older dog and we needed to just keep aware of it and hope it didn't get worse. We found this product on line, read about it and the other reviews and decided we should give it a try. Juggy has been on this for about a year now and at his last check up, the vet had a hard time finding the murmur! He said if it's there at all, it would have to be labeled a 1. He said whatever we're doing, keep doing it! We are thrilled with this product. Juggy takes 2 miles run/walks again, chases his frisbee and is always bringing chew toys to us to play pull or toss with him. He really has gotten back his energy and we couldn't be happier. This product is awesome!

12/29/2015  5.0

Such a miracle product for my dog!
By Dan from Warren, MI

Comments about Pet Wellbeing Young at Heart for Dog Heart Disease:

This is the best product I have ever used for my twelve year old Pomeranian. He has congestive heart failure and a very bad cough started about three months ago. We tried glucosamine, prednisone recommended by the Veterinarian and nothing worked. I stumbled on to the Petwellbeing site and it was a god send. My Pomeranian skin color on his belly was even turning black for some reason from this cough due to his condition. I gave the medicine to him twice a day starting Dec 1, 2015. What a huge improvement, his coughing calmed down by 85 to 90% for almost a month he has been on it. His skin color came back on his belly to a healthy pink color and he has more energy running around the back yard. Thank You so much for creating this medicine for dogs. I will be ordering it today!
Thank You Again!
Dan Alexander

Dynamite does come in small packages!
By Greatful pet owner from Ellabell, GA

Comments about Pet Wellbeing Young at Heart for Dog Heart Disease:

I have an 8 yr old mini american eskimo. She was recently diagnosed with an enlarged heart. The vet put her on the usual heart meds and 2 antibiotics and a bronchilator medicine. My dog seemed sicker than ever after starting these harsh drugs. She would over drink her water and within a few minutes throw it all back up. I found this website and started her on YAH as soon as I could. The result is amazing to say the least. No more coughing, no more over drinking, no more throwing up, she wants to play ball every day, is eating well, etc etc. I am in awe of what this product has done for my dog. I am very greatful to have found this product. It is making a world of difference for my little one. The best thing, no more harsh meds for my baby! I feel I made the best decision to switch her to YAH. Thank you!

So thankful for this product - will be buying again
By Tucker's Dad from Mohrsville, PA

Comments about Pet Wellbeing Young at Heart for Dog Heart Disease:

Bought Young at Heart, because my 9 year old Cavalier King Charles Spaniel started the cough associated with congestive heart failure. Online research showed that traditional medications would be hard on him, so I tried this first. Within one week the cough stopped and he has more energy than he's had in years. His breed is more likely than others to have heart problems and I am so glad to be able to help him without having the harmful side effects in traditional treatments. Young at Heart turned back the clock in his health. After a few weeks we had one day when he was sick on the stomach (might have been the product since it happened both times after a dose) and I simply reduced the number of drops that I gave him and haven't had any problem since then.

Keeping my dog's heart murmur in check
By C.N. from Longmont

Comments about Pet Wellbeing Young at Heart for Dog Heart Disease:

My 10 yr. old toy poodle's heart murmur was at a level 4 when I first adopted her. Using this product daily along with other medicines recommended by my vet took her down to a level 3 for the last two years until her hip broke (from a previous injury) and now she has to take Tramadol. I think that's made her Young at Heart doses less effective. The bottle lasts for 3-4 months (6 drops a day), so the cost isn't as bad as it seems. I mix it and the other meds with a dab of peanut butter. She looks forward to it! I totally recommend it! (Just not with Tramadol.)

And IT Works!
By pretties from Deland, FL

Comments about Pet Wellbeing Young at Heart for Dog Heart Disease:

I have a house full of Poms & Chis that are really up there in years, Seniors! Three have CHF ... and as a Doc of Holistic Health I prefer to use alternative supplements to Rx's that the Vet likes to recommend! Results are quick and effective... w/the Young at Heart I saw a major improvement in my little ones w/in the first week... Amazing! Easy to administer ... they Love the Bacon Flavor! When I got my first Senior Pom/Chi he was in very bad shape... but w/in week... well, I can say Miracles Do Happen... that was 3 years ago... he is a happy, busy little guy! His condition is under control... He Loves Life! Thanks to PetWellBeing products!

from salt lake city, UT*

Comments about *Pet Wellbeing Young at Heart for Dog Heart Disease*:

This product has extended the life of our dog. We have a spaniel that is around 13 years old. He was really struggling for awhile with his energy level and just wasn't doing very well. At a veterinarian visit about 1 year ago, the doctor said he would probably live about 3 more months. I started him on the young at heart drops a couple weeks after that visit to the vet. He is doing so much better than we ever expected on this product. We also give him the adrenal harmony drops, which have helped immensely, as well. My daughter (our dog's best buddy) was away traveling for 18 months, and we didn't think our dog was going to live long enough to be able to see her again. Because of your products, we were able to witness a wonderful reunion between our dog, Peter, and our daughter! I can't thank you enough for making effective pet-care products that really make a difference!

*It's" close to a MIRACLE !
By Pat from Converse, TX*

Comments about *Pet Wellbeing Young at Heart for Dog Heart Disease*:

My beloved 11 year old papillon, Charlie was diagnosed with chronic renal failure about 3 years ago and the Kidney Gold Support worked wonders.
To make matters worst, last year at Christmas he began breathing fast and developed a frothy cough. After a heart ultrasound the veterinarian diagnosed him with moderate right sided heart failure and gave me Enalapril for him twice dally.
After a couple of weeks his heart rate was pretty controlled but he continued to experience the productive cough with mild exercise and intermittently throughout the day. The cough woke him during the night and his energy level was still decreased.
I started giving him the Young at Heart 6 weeks ago. I administered it in conjunction with the Enalapril for two weeks (AM dose of Enalapril and evening dose of Young at Heart). After three weeks he was not having a productive cough , his activity level was increased , he was eating better and sleeping very sound. He's got some PEP in his step. LOL !
I TRUST the Pet Wellbeing products because THEY WORK !!!!
In fact I already recommended your product to another pet owner. Thank You for a Great Product !

We are so grateful!
By DogMa from Marin County, CA

Comments about Pet Wellbeing Young at Heart for Dog Heart Disease:

We are so grateful to have found this remedy! Our 12 year old Hurricane Katrina rescue girl has been suffering with heart issues, and I just couldn't bring myself to have her take the extremely harmful heart medications that the "specialist" recommended.

After less than a week, we have noticed that Scruffy Pearl has not only perked up significantly, but she has also found her voice! She has never been a talking or barking dog, now she voices her needs on a regular basis! She is chasing her tail, running with her pack, and does not pant hard or sleep all day any longer.

She has been on the drops 2 times per day, for the past two weeks now, and we are 100% positive her renewed vigor for living is due to your product!

Thank you for giving our girl back her zest for living!

Vet is weaning my dog off of CHF drugs now!
By Robin

Comments about Pet Wellbeing Young at Heart for Dog Heart Disease:
At the start of this year my 14 year old Pom had dental surgery. His eye was punctured and destroyed... he nearly died of the infection and required a second surgery 4 days after the dental and lost the eye. He has had a heart murmur all his life. My (new) vet believes the stress sped up the increasing size of my dogs heart and the pressure caused him to cough and gave him 6 months, at most, to live - with the aid of pharmaceuticals (if you are curious furosemide, Pimobenden, Hycodan syrup. I searched online, found the site, this product and all the reviews.

It is now 8 months from when I ordered the Young at Heart. My dog is now being weaned off his medication and is taking half the cough syrup. Being told my love, my family member, my best friend, my dog was going to choke to death as his lungs filled with fluid was horrible. Being told I only had the summer to be with him was unbearable. Thank goodness I found this product. My dog is happy, as healthy as his little body can be given his rough year and playing with our other dog like he always has.

I recommend this product with enormous confidence. I am sure vets make mistakes in estimating life span... however scans of the size of my little loves heart in his body don't lie. My dog is healing and getting better. with a warm heart and gratitude beyond words thank you Pet Wellbeing. Images shared by Robin Life is wonderful

By Janet's crew
from Montreal, QC

Comments about Pet Wellbeing Young at Heart for Dog Heart Disease:
April 2015, I was advised that my 15 year dog has CHF and is in stage 4, the vet prescribed a diuretic and an ACE inhibitor and wished me good luck. I read the side effects of the inhibitor

and freaked out....she is a very vibrant dog and never had a health issue until this. A friend told me about this product. Needless to say Shaggy had a blood test last week and her heart is actually doing well, she will never be 100% but she is defiantly better than she was in April. I still have to give her the diuretic 2 x a day but the dosage is minimal. She is active and her tail is doing a lot more wagging lately compared to 4 months ago.

Wonderful product for my aging Golden Retriever
By Jersey Girl from Moses Lake, WA

Comments about Pet Wellbeing Young at Heart for Dog Heart Disease:

I add this to my thirteen year old Golden Retriever's food that he readily eats each morning. I have been giving it to him for years-ever since his enlarged heart diagnosis. He still is going strong and I attribute his good health to this product. I just wish it would help his aging hips!! Jack and I thank you for a wonderful product.

Bottom Line Yes, I would recommend this to a friend

7/17/2015 ★★★★★ 5.0

THIS STUFF WORKS LIKE A MIRACLE!!!!!!
By frenchyvette from Emeryville, Ca.

Comments about Pet Wellbeing Young at Heart for Dog Heart Disease:

I have a 13 year old Pekingese that went from a grade 2 heart murmur to a grade 3 heart murmur in about 1 year's time. The vet recommended I take my dog for a echo-cardiogram and consult with a cardiologist. I did consult with the Cardiologist, but he was recommending a lot of expensive testing. I also did a lot of reading on cardiac medications for dogs and the side effects sounded so awful. I decided against the echo and against seeking treatment from the cardiologist.

I searched online for a natural alternative and found Young At Heart. The reviews sounded great but a little too good to be true. I decided to give it a try anyways and am I glad I did! I started to notice a slight difference after a week. It was subtle at first, but steadily got better and better. After about 5-6 weeks, he was back to his old self. Eating, wanting to walk and scampering around the loft. Before Young At Heart, he was really tired. HE wasn't eating as much and isolating himself.

Thank you to all the other reviewers and thank you Pet Well Being for giving life back into my beloved Maxx.

7/16/2015 ★★★★★ 5.0

Gave me hope! Great product!
By Jennifer from Southeast Asia

Comments about Pet Wellbeing Young at Heart for Dog Heart Disease:

I'm American but live in a remote part of Asia. I have rescued a dog that acquired congestive heart failure from previous poor care and diet. We believe the previous owner only fed her rice and soft foods, so when we found her in the grass, she only had 7 teeth and the worst case of periodontal disease I have ever seen This has effected her heart and health over time. The Vet care here is poor at best and we were really desperate for something to help the quality of life of our 12+ year old mix breed dog. Her coughing and lack of energy was heartbreaking and not

having good care here made us fear the worse for her little life. I was online and saw an ad for Pet wellbeing and thought I would browse the site. My heart leapt with joy when I saw the Young at heart drops and read the testimonials. I immediately ordered 2 bottles and asked my mom to mail to me. Within 2 weeks, I have seen significant improvement in my dogs overall demeanor, energy and coughing less frequently. We are approaching 3 weeks and I couldn't be happier with the results already. I am encouraged to use the product long-term and see what other improvements will take place. I am thrilled with no side-effects and easy administration to my finicky little pooch! It was a real answer to prayer for me and my furry companion who means so much to me when living so far from home. I am confident she will live longer and her quality of life is only improving from here. Thank you so much for discovering this product and making it available online for purchase at a good price. I already told my family and friends about it and I know my mom ordered the lung drops and is seeing improvement in her shih-tsu. We will be sure to keep recommending this holistic treatment to many! THANK YOU!!!! <3

Great results!

By Paris's momma from Cincinnati ohio

Comments about Pet Wellbeing Young at Heart for Dog Heart Disease:

I found out a year and a half ago my 11 year old cocker spaniel, Paris, had congestive heart failure. Over the course of this time the vet has slowly had to increase her Meds to what is now the highest dosage recommended. Her condition was continuing to advance regardless of the high dosage. I felt helpless watching her suffer and not being able to give her relief. I got online looking for answers, and thanks to other users of young at heart, I found them. I immediately ordered what I hoped was my girls relief from this chronic condition. I continue her Lasix with her drops twice a day. Her condition has improved and she is no longer over medicated. I know I can't reverse the disease, but I can make her comfortable and back to her old self with this natural alternative. From the bottom of my heart, thank you!!! I feel because of Pet Wellbeing my Paris is still with me.

"Sounds to good to be true?" IT WORKS!
By lil Buddy's momma from Madisonville KY

Comments about Pet Wellbeing Young at Heart for Dog Heart Disease:

My 12 1/2 yr old 6 lb Chihuahua Buddy was diagnosed with an enlarged heart 12-09-14. Sent home with enalapril for his heart and torbeugesic to "keep him comfortable." I began giving the meds at 1/2 prescribed dose and it was awful so I gave 1/8 dose, I thought he wasn't going to make it, his symptoms went from mild to severe on the meds and no appetite. I researched every spare minute and finally found Pet Wellbeing. I ordered YAH and started weaning off the prescribed meds and transitioning in the YAH. He is as he was before, a once in a while mild cough, but I believe with every dose of YAH his heart is stabilizing and possibly getting better. We may have to use the Vet meds later but not now thanks to YAH!

1/29/2015 ★★★★★ 5.0

So far Great!
By Nique from Chicago, IL

Comments about Pet Wellbeing Young at Heart for Dog Heart Disease:

My Chihuahua is approx. 10 years old and has been treated for Congestive Heart failure for almost 2 years now. I noticed over the last 6 months her cough had been getting progressively worse and it was disturbing. I had her on Lasix, Vetmedin and Enalapril daily, but the cough was getting worse. I decided to do my research because I know this disease progresses and I did not want to lose my dog. I found this product and read the reviews and decided to give it a try. The first two days I noticed a slight difference, but it's now day 7 and I she is sleeping through the night, not coughing when she wakes up and today, she was actually running through my house and only coughed slightly. I can see a Major difference in my dog. I took her off her meds, all but the Lasix because I don't want fluid to fill around her heart; not sure of this works for that. I am very pleased with this product and will pass the word around. Thanks so much!!!!
Bottom Line Yes, I would recommend this to a friend
