

# Mr. and Mrs. Roboto

*Design courtesy of Bisque Imports*

This dynamic trio will brighten up anyone's day!

## MATERIALS

GSLAB200 Opaque White Glass Slab  
GBLOC533-1 Sky Blue Blocks  
GBLOC267-72 Sunflower Blocks  
GBLOC2702 Orange Opal Opaque Blocks  
BC-223-72-20 Turquoise Green Buffalo Chips  
RO2302-96 Opaque Medium Blue Rods  
GSTRIP200 White Strips  
GBLOC230-72 Medium Blue Opal Opaque Blocks  
GBLOC226-74 Opaque Amazon Green  
S5262-96 Moss Green Translucent Stringers  
N355-96 Marigold Noodles

## TOOLS

ST340 1" Running Pliers  
Elmer's Gel Glue  
Klyr-Fire  
Small Plastic Cups  
ST352 Pistol Grip Glass Cutter  
Q-tips  
Sharpie  
Small Orange Glass Scrap for Beak  
ST540 Thinfire Paper  
ST352 Wheel Mosaic Cutter

## INSTRUCTIONS

1. Using the Pistol Grip Glass Cutter, score and break the White Slab into three 3x6 inch sections. You will use the extra white glass later in the project.
2. Build the body of the first robot by cutting an Amazon Green Blank into a rectangle. You may sketch your shape on the glass block with a Sharpie before you cut. Attach with a small amount of Elmer's Glue.
3. Score and break two thin legs out of a Sunflower Block. Repeat with Sky Blue to create arms and a head. Attach both to the glass blank.
4. Embellish Mr. Roboto with various glass components. Nip off small sections of the Opaque Medium Blue Rods to create rod dots for his legs and eyes. Nip off sections of a Marigold Noodle to create a mouth and antennae.
5. Now it's time to create the rocket! Score and break two identical rectangles out of the Sky Blue Blocks and the Medium Blue Opal Opaque Blocks. Attach to the slab.
6. Cut a triangle out of the Sunflower Block, then trace the shape onto an Orange Opal Opaque Block. Create a second line just inside the outline, and cut a smaller triangle to fit inside the Sunflower one. Attach to the top of the rectangles.
7. Break off small pieces of the Moss Green Translucent Strings and place underneath the body of the rocket to create the look of steam. Advanced tip : Add flame shapes to the body of the rocket by carefully scoring wavy lines on a Sunflower Block. Break the pieces and glue to the Rocket with a small amount of glue.
8. And last but not least, Mrs. Roboto! Score and break a large Sunflower triangle and attach to the center of the final white blank.
9. Cut thin strips of Sky Blue for legs, and an Amazon Green square for her head. Now she's ready for accessories! Scatter Turquoise Green Buffalo Chips around her dress, and place two scrap pieces of Sunflower at the base of her legs as feet.
10. Nip off pieces of Marigold Noodles for antennae. Using any remaining scrap pieces, create a pinwheel of color next to her body. Cut a thin strip of Sky Blue as a handle and attach.
11. Fire to a contour fuse.
